

The Starparts range of compatible Binzel® Mig torches are made up of a full range of quality semi-automatic air and water cooled, push pull and fume torch packages.

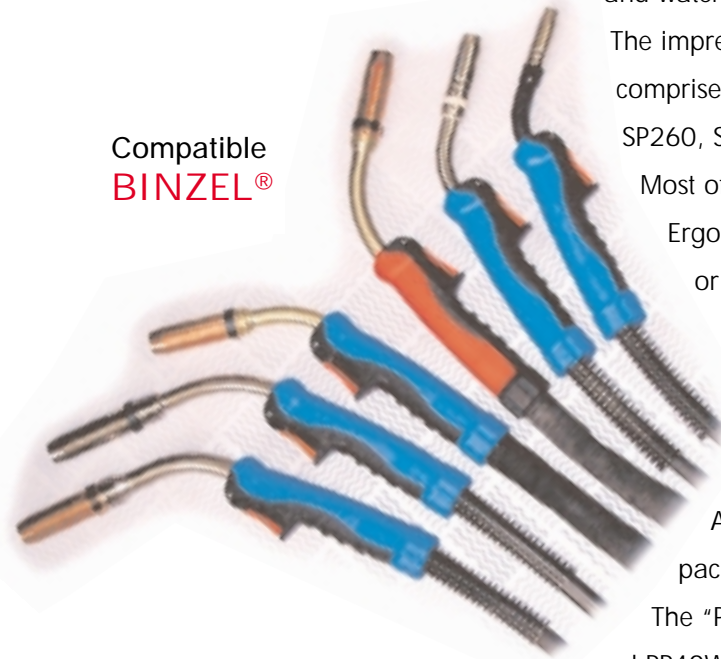

The impressive semi-automatic air and water cooled range comprises of the SP140, SP144, SP145, SP150, SP230, SP240, SP250, SP260, SP360, SP380, SP400G, SP241, SP350, SP401 & SP501.

Most of these torch packages are available with the Starparts Ergonomic handle system in either Microswitch or Bladeswitch option and are available with either conventional Blue and Black or a new look Red and Black colour. A new "Swivel System" Ergonomic handle will soon be available to further expand torch selection, together with the exciting new "Starflex" co-ax cable system. Alongside the conventional "T" Bar "PP" series of push pull torch packages comes the new in line "PPL" series.

The "PP" range comprises of the PP240, PP260, PP360, PP24W and PP40W with the PPL series consisting of the PPL250 and PPL410.

Completing this torch family is a series of Fume Extraction packages comprising of the SF15, SF24, SF25, SF26, SF282 and SF501.

Compatible
BINZEL®

Compatible
TWECO®

This range of compatible Tweco® torch packages offered by Starparts comprises of the SP1, SP2, SP3, SP4, and SP5.

All of these Torch packages are available in either Euro or Tweco® termination in 10, 12, and 15ft lengths.

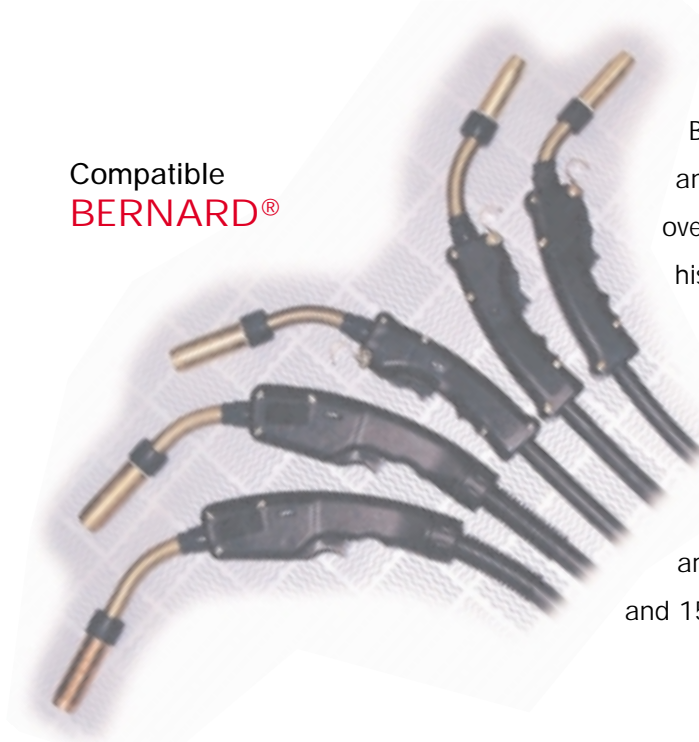

**NEW
PRODUCT**

An exciting new product into the Starparts range is the FKS400 water cooled Mig torch. Available with the Starparts Ergonomic handle and in 3, 4 & 5 metre lengths.

This innovative new product allows water cooling right up to the nozzle, thus giving greater consumable life span and a more lightweight torch design over the conventional SP401 / 501. Please ask our export sales team for further details.

Compatible
BERNARD®

Alongside the compatible Tweco® range stands the Starparts compatible Bernard® range of Mig torch packages.

By bringing part of the assembly process into our manufacturing and assembly facility, we now have greater control and flexibility over both these ranges and are able to offer a quality series of historically expensive Mig torches at very affordable prices, without compromising on quality. The compatible Bernard® series comprises of the SP202, SP302, SP302E, SP352, SP402, SP402E, SP502 & SP602E.

All of these packages are available in 10, 12 and 15ft lengths.

This range of high quality compatible Tregaskiss® torch packages from Starparts comprises of the T-150, T-200, T-300, T-400, T-400A, T-500, T-500A & T-450W. All of these packages are available in 10, 12, and 15ft lengths.

Compatible **TREGASKISS®**

Compatible
MECHAFIN® / MUREX®

Exciting new additions to the Starparts family is a full range of Mechafin® / Murex® torch packages and a full range of compatible PXL® torch packages.

Also available in our Mig section are larger ranges of consumables compatible with Esab®, Kemppi®, Miller®, Fronius®, OTC®, Lincoln®, Dinse® & Hobart®.

Compatible
P-X-L®

A full range of main and secondary consumables are available for all the above mentioned torch packages. For further details consult our main Torch & Consumable Directory or contact the Starparts Export Sales Team with your enquiries.
